#### DETAILED ACTION

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1:
  - I. Claims 1-8, drawn to a molecular complex comprising a tissue extract and a sugar and or polypeptide.
  - II. Claims 9-11, drawn to a monocyte derived cell.
  - III. Claims 12 and 15, drawn to an *ex vivo* method for stimulating an immune response.
  - IV. Claims 13 and 14, drawn to an *in vivo* method for inducing an immune response.
  - V. Claim 16, drawn to a method of treatment of diseases involving accumulation of conditioned monocyte derived cells.
3. The inventions listed do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Fiani et al. teaches a monocyte derived cell of Group II that could be prepared by contacting monocyte derived cells with the sugar-containing molecular complex of Group I (the sugar would be bound by the macrophage mannose receptor).

Since Applicant's inventions do not contribute a special technical feature when viewed over the prior art they do not have single general inventive concept and lack unity of invention.
4. Accordingly, Groups I-V are not so linked as to form a single general inventive concept and restriction is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Gerald Ewoldt whose telephone number is (571) 272-0843. The examiner can normally be reached Monday through Thursday from 7:30 am to
